Applicant(s)

DE TAVEMIER, SERGE

Examiner

MATT J. SMITH

Art Unit

3635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.

- 6) ☐ Other: ____.

Drawings

The drawings are objected to under 37 CFR 1.84(h)(5) because Figures 4, 5, 6, 9, 11a, 11b show modified forms of construction in the same view. Figures 4, 5, 6, and 9 should be labeled as, e.g., 4a, 5a, 6a, 9a and the cross section views, A – A, B – B, C – C, A – A, respectively should be labeled as Figures 4b, 5b, 6b, 9b, and 11c

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lynch (5410844).

Lynch discloses a device for protection against solar radiance comprising crossed elements 15 positioned on one level but laterally spaced in order to provide for vents 38 allowing air circulation between the a room and outside; the elements positioned on two levels, Fig. 3; the vents masked by parts 43 hanging to the vents to prevent sun rays penetration without preventing air circulation through the vents; mobile shutters 43 fastened on the elements' lower edges in the horizontal direction and spaced between two neighboring elements; actuating devices connected together allowing simultaneous actuation of several shutters; ridges fitted with strips 51 that stiffen the structure and protect mobile shutter ends against rain; the elements fastened on a tie 50 and the tie being stretched between structure elements; the elements' free edge provided by a tie 50 stretched between structure elements; the elements free edge provided by cloth strip 42 stretched between structure elements; and the elements of a same panel are positioned on slopes that are parallel to the perpendicular of their panel.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vollebregt (5513470) and Schultz et al. (3566555) present vented solar screens.
